

## RECEIPT OF ENVIRONMENTAL PROTECTION AUTHORITY (EPA) LEVEL OF ASSESSMENT FOR PROPOSED MINING OPERATIONS NORTH OF BINDOON W.A.

Bauxite Resources Ltd has received a Notice from the EPA advising that its proposed minimal impact mining of 1.2 million tonnes of bauxite at a private farm north of Bindoon from July 2010 to December 2010 will require assessment via a Public Environmental Review. The Board of Bauxite Resources Ltd is considering its options following the EPA determination which may include appealing the decision. The company expects to be able to release a detailed announcement in the next two business days to enable the current voluntary suspension to be removed.
